

In this project, I am talking about my feelings abroad. I have been studying abroad since I was 16 years old. I went to high school in America and came to England to study fashion. I used to have homesickness because I missed my friends, family, and food in Korea. I thought about my hometown and my childhood memories. Lantern is a specialty of my hometown. The origin of lantern as a local specialty is during the Japanese Invasion in Korea, people floated lanterns on the River in my hometown to send their regards to their families. I think this meaning of lantern is similar to the feelings that I feel while studying abroad. Every year, there is a big Lantern Festival in my hometown. It is a good memory of my childhood that I went to the festival with my family every year before I start studying abroad. So the lanterns remind me of my childhood memories and my hometown.

I got inspiration from the shape of a floating lantern. I'm focusing on three things in this project. I am working on the project focusing on the transparent material of the lantern, the flow of the river, and the light and shadow.

A background image of a river with a textured bank. The water is depicted with wavy lines, and the bank is a dark, textured surface. The overall tone is monochromatic and artistic.
